Principal's Message

Dear parents/guardians, We want to extend our warmest welcome back after the spring break. We hope that our students and staff had a relaxing and re-energizing break with their families and friends. Now, they are ready to start the last term of this academic year. We also want to continue to express our appreciation to you for your support during this challenging time. Similarly, we thank you for your patience and partnership as we work together to support your child's learning. Finally, it seems that we will move to everyday life as we had before the pandemic. Our faculty have been working on planning some exciting activities and events here at school for the remaining months of the school year. For example, we are hosting our Annual Science Fair Competition on April 29. We have invited students from grades Kindergarten through to grade 6 to participate. Students can prepare either a Science Experiment or a Research Project. We also ask parent volunteers to help judge the fair. Please inform your child's teacher before Monday, April 18, if you are interested in volunteering for this event.

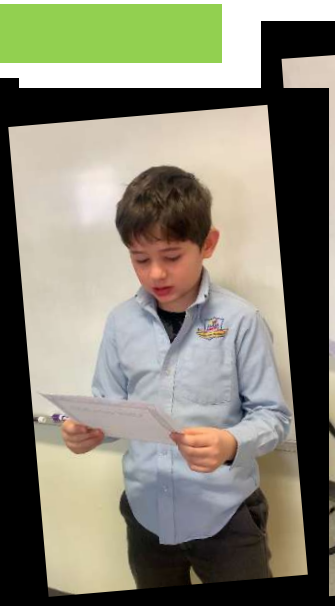

We will be picking the top 3 winners from ECS-2 and the top 3 winners from grades 3-6. Please take advantage of the science fair planning toolkit sent home before spring break for your planning. Good luck to all the junior scientists!

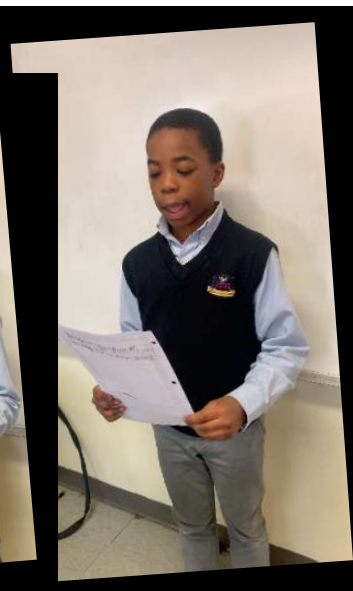

March Events
